IT is not intended in this book to show more than the colors in general use. A complete exhibit would require too large a collection.

We also make special inks, such as alkali-proof inks; inks for embossing presses; plate inks and oils; copying inks; proving inks; bookbinders' inks; trichromatic inks; duochrome inks; cover paper inks; inks for printing on wood or metal; reducing, lithographic and other compounds and varnishes; gold and silver inks; gold size; aluminum and bronze powders. Also inks for fast Web Presses—both black and colored—specially adapted for long and continuous runs.

Having a competent staff of experts we also undertake investigations in the nature and composition of inks for unusual requirements.

Price list furnished upon application for printing and lithographic inks, and special quotations given on inks in large quantities.

We have the best facilities for matching, at short notice; and in ordering inks where special results or exact matching are desired, it is advisable to send sample of paper to be used.
